

Trusted Cybersecurity Solutions for Critical Business Operations July 2020 Newsletter

Radiflow Launches version 5.7 of its iSID Industrial Threat Detection Platform

New version offers over a dozen improvements including automatic asset identification, threats prioritization using dynamic risk calculation and refined Deep Packet Inspection (DPI) across an expanded suite of OT protocols. [Learn more](#)

Radiflow enables IEC-62443 compliance - here's how

We've prepared a practical guide for conducting IEC-62443 assessments, including identifying critical business processes, prioritizing each process's risk scenarios and effective countermeasures. [Learn more](#)

Behind-the-News Analysis: Cyber-Attacks on Honda, Enel Group

According to industry analysts, both incidents were targeted attacks using EKANS/SNAKE ransomware, which at least in the Honda case, caused various business disruptions including disruption to production line operations. [Read report](#)

Behind-the-News Analysis: Steganography-

based attacks threaten industrial enterprises through their supply chain vendors

A newly-discovered campaign against hardware & software suppliers to industrial enterprises, using malicious payload in ordinary images, again sheds light on the cyber risk originating from enterprises' supply chains and partners. [Read report](#)
